About me

- Jeppe Leth Nielsen
- Copenhagen
- Android Developer
- Java 5-6 years
- Android 4 years
- Currently work as consultant at Jayway

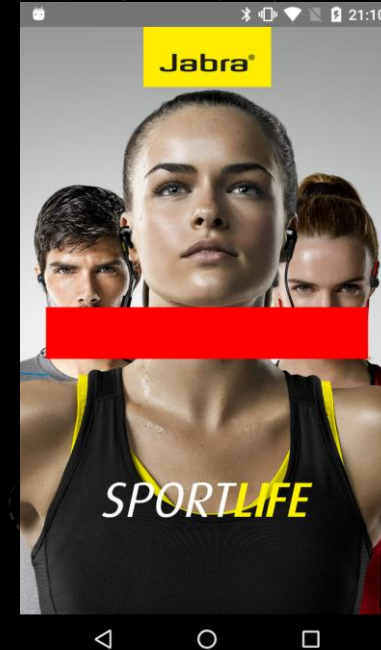

- Github [JeppeLeth](#)
- Twitter [@JeppeLeth](#)
- [Facebook](#) / [Google+](#) / [LinkedIn](#)

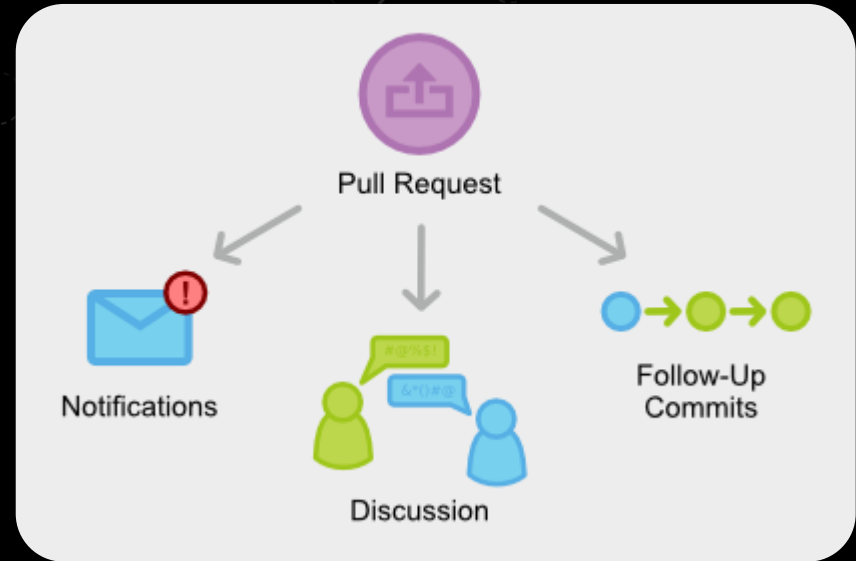

Team setup

- SCRUM
- Android
- iOS
- Tester
- Product Owner
- SCRUM Master
- UX
 - no backend
- 2 weeks sprints
- Daily standup
- JIRA for stories and tasks
 - Estimated by developers, prioritized by PO
- Jenkins for CI

Pull requests

- Git @ Bitbucket
- Explain your concerns
- Have an alternative
 - explain what is better
- Avoid fast review when busy
- Have 2 reviewers
- Don't use time on comment
 - just fix and get on with your work
- Don't do monster pull requests
- Reformat code in separate commit
 - or point out where in the code your change is located

Other experiences

- Meet weekly
- Collaborate across platforms and with UX
- Prefer platform differences
 - but functionality should be common
- Choose your own tools/OS
 - but have a common format that can be used by all (text files vs. excel)

What are your experiences?

Feedback and questions are also welcome ;)

JeppeLeth
